

UPS Industrial Control Panel Applications

TRACK SERIES 120V COMPACT TOWER UPS Line Interactive UPS with True Sinewave

Ideal for critical applications requiring true sine wave output with the efficiency of a line-interactive design. Automatic Voltage Regulation provides mitigation of sags and swells without relying on backup battery power. This conserves battery energy for more severe disturbances such as power interruptions and outages.

DIN RAIL UPS SERIES Industrial Rated UPS

The Sprint Series DIN Rail AC UPS is an industrial-rated uninterruptible power supply that features a wide operational temperature range in a compact package. These models feature hardwire input / output connections, a hot swappable battery and various communication options.

Please contact us for additional models of these featured series.

The Marathon Power Industrial UPS Advantage

Marathon Power Industrial UPS's are designed to provide protection in the most rigorous environments. Hazardous conditions such as extreme or uncontrolled temperatures, excessive humidity and harsh chemicals require a durable Industrial UPS that can withstand these elements and ensure the highest level of protection.

Applications

- Semiconductor Fabrication Equipment
- Industrial Control
- Process & Motion Control
- Robotics & Factory Automation
- Water Treatment Equipment
- CNC and other Electro-Mechanical Machines

in Marathon Power Inc.
