Ruggedized Traffic UPS

650VA / 650W

PRODUCT INFO

Traffic control and signal equipment consistently experience power interruptions. The Marathon Power Ruggedized Traffic UPS series are maximum performance systems suitable for a wide range of transportation applications and extreme temperature environments. Designed for extended run-times, these units also feature temperature-compensated charging to maximize battery life in harsh environments. The units are extremely versatile and fully programmable to give complete control of system programming and data acquisition. They can also be customized to meet the requirements of your transportation application, making our units the most versatile battery back-up solution for traffic control and public safety.

Our latest model in the series is a compact 650VA / 650 watt model with a 24VDC bus that is designed for today's modern traffic cabinets and the smaller loads that are now prevalent with the use of LED lighting for signals. The unit is contained in a rugged, low profile 2U, rack- or shelf-mount chassis and has 4-line LCD panel to display various data, parameters and settings. There is also a 12 amp internal charger to ensure that larger battery strings are recharged in an appropriate amount of time.

FEATURES & BENEFITS

- High Output Power Factor – 1.0 PF
- Backlit 4-line LCD Display and LED indicators.
- 12A Selectable Temperature-compensated charger. Maximizes battery life in harsh environments.
- Backs up power to traffic control and signal equipment.
- Anderson Powerpole connectors.
- Fits in all types of traffic enclosures, control panels and custom pedestals.
- Low harmonic AC sine wave output in backup mode.
- Fully programmable AC threshold voltages.
- Transient voltage protection from damaging spikes & surges.
- External connections accessible from the front panel.
- Six fully programmable dry contacts for greater control.
- Remote access via RS-232, USB & Network.
- Time / Date stamp of events and alarms - up to 100 events.

EXTREME ENVIRONMENTAL CONDITIONS

RUGGEDIZED TRAFFIC UPS

APPLICATIONS

- ❑ Traffic Controls
- ❑ Signal Equipment
- ❑ Transportation Equipment

ANDERSON INPUT / OUTPUT CONNECTORS

4-LINE LCD DISPLAY

TEMPERATURE SENSOR

PROGRAMMABLE DRY CONTACTS

BATTERY BREAKER

ETHERNET
