WE GO THE DISTANCE FOR YOU
Why a Traffic BBS?

Traffic control and signal equipment consistently experience power interruptions. The Marathon Power Traffic BBS series are maximum performance systems suitable for a wide range of transportation applications and extreme temperature environments.

Applications

- Traffic Controls
- Signal Equipment
- Transportation Equipment
- Automated Parking Facilities
- Electronic Tolls
- Transportation Signs

Features & Benefits

- Suited for wide temperature range applications.
- Fits most traffic enclosures, control panels and pedestals.
- Suited for harsh outdoor environments.
- Remote access via RS-232, USB and Ethernet.
- Fully programmable AC threshold voltages.
- Transient voltage protection from damaging spikes and surges.
- Fully customizable
- Long life components

Communication Options

- SNMP / Web Card
- AS-400 Dry Contact Relays

Accessories

- Battery Harness Kit
- Maintenance Bypass Switch
- Mounting Brackets

Maximum Protection in Harsh Environments & Extreme Conditions

Marathon Power Traffic BBS’s are designed to withstand extreme conditions.

Temperature compensated charging maximizes battery life in harsh outdoor environments. The units contain conformal coating on all electric components that resist corrosion, rust and decay making them ideal for the most critical and sensitive applications.
Marathon Power Traffic BBS’s are the most versatile battery back-up solutions for traffic control and public safety. Our Traffic series offers both Line Interactive and Double Conversion technology. They are also extremely versatile and fully programmable to give complete control of system programming and data acquisition.

**Line Interactive**

Line-interactive Battery Backup Systems use automatic voltage regulation (AVR) to correct abnormal voltages without switching to battery.

![Line Interactive UPS Images](image)

**Double Conversion**

Double-conversion technology is ideal for the most critical and sensitive applications where the best level of power protection is required.

All models available in 120V and 230V versions. For specifications, backup times and battery options please see individual products sheets or go to marathon-power.com.
The Marathon Power Advantage

Marathon Power offers a wide range of Line Interactive and Double Conversion Battery Backup systems. We specialize in unique models and custom solutions for niche markets.

All of our products are made to ISO 9001 certified standards and the result is a stable, total quality oriented supplier capable of meeting the specific needs of our customers.
