TRAFFIC & TRANSPORTATION

Customizable Battery Backup Systems

Maximum protection for traffic control and
signal equipment in extreme temperatures
and harsh environments.

WE GO THE **DISTANCE** FOR YOU

Why a Traffic BBS?

Traffic control and signal equipment consistently experience power interruptions. The Marathon Power Traffic BBS series are maximum performance systems suitable for a wide range of transportation applications and extreme temperature environments.

Applications

- Traffic Controls
- Signal Equipment
- Transportation Equipment
- Automated Parking Facilities
- Electronic Tolls
- Transportation Signs

Features & Benefits

- Suited for wide temperature range applications.
- Fits most traffic enclosures, control panels and pedestals.
- Suited for harsh outdoor environments.
- Remote access via RS-232, USB and Ethernet.
- Fully programmable AC threshold voltages.
- Transient voltage protection from damaging spikes and surges.
- Fully customizable
- Long life components

Maximum Protection in Harsh Environments & Extreme Conditions

Marathon Power Traffic BBS's are designed to withstand extreme conditions.

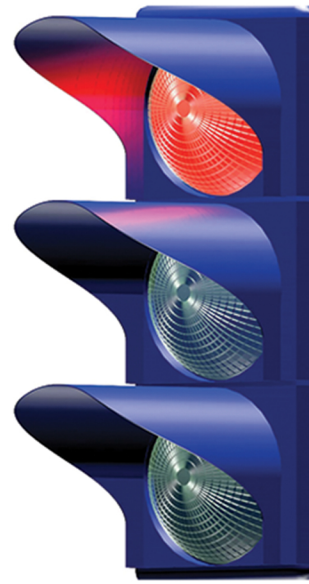

Temperature compensated charging maximizes battery life in harsh outdoor environments. The units contain conformal coating on all electric components that resist corrosion, rust and decay making them ideal for the most critical and sensitive applications.

Communication Options

- SNMP / Web Card
- AS-400 Dry Contact Relays

Accessories

- Battery Harness Kit
- Maintenance Bypass Switch
- Mounting Brackets

Marathon Power Traffic BBS's are the most versatile battery back-up solutions for traffic control and public safety. Our Traffic series offers both Line Interactive *and* Double Conversion technology. They are also extremely versatile and fully programmable to give complete control of system programming and data acquisition.

Line Interactive

Line-interactive Battery Backup Systems use automatic voltage regulation (AVR) to correct abnormal voltages without switching to battery.

Ruggedized Traffic UPS / BBS
2000VA / 1500W

Ruggedized Traffic UPS / BBS
650VA / 650W

Ruggedized Track UPS / BBS
2000VA / 1500W

Double Conversion

Double-conversion technology is ideal for the most critical and sensitive applications where the best level of power protection is required.

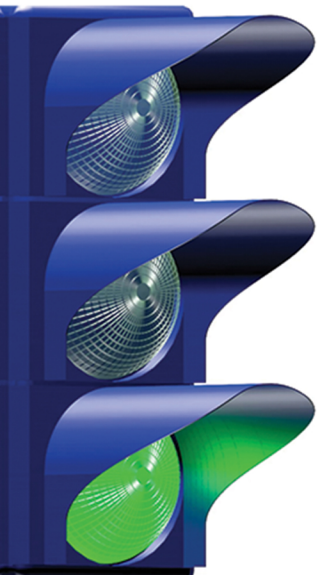

24VDC Ruggedized Vault Rackmount Series
1000VA / 1500VA
700W / 1050W

Ruggedized Vault Tower Series
700VA / 1000VA / 1500VA
490W / 700W / 1050W

All models available in 120V and 230V versions. For specifications, backup times and battery options please see individual products sheets or go to marathon-power.com.

The Marathon Power Advantage

Marathon Power Inc. is approved for and follows the internationally recognized standard, ISO 9001:2015 Quality Management System. This certification demonstrates our commitment to providing the highest standards of quality in all our products and services. With this certification, our customers can have complete confidence in our ability to deliver exceptional quality and value in meeting your requirements.
